

February 2018,

## **Export Grain Analysis – in a timely manner without delays!**

### **Kent Agri Lab Ltd is ready to start testing today.**

**Kent Agri Lab Ltd.** is now authorized to perform testing under the REGAL Program for "Phytosanitary Inspection of Grain for Export." The Recognition of Export Grain Analysis by Authorized Laboratories (REGAL) program is an alternative service delivery program for grain exporters. Under the REGAL program grain exporters may have their grain shipments tested by Kent Agri Lab Ltd., a private seed laboratory, and the CFIA will continue to issue phytosanitary certificates. REGAL authorized laboratories are permitted to test grain shipments of all types of crops being exported to India, China and Mexico.

#### **Kent Agri Lab Ltd. commitment to Grain Exporters:**

- Testing initiated within one business day of receipt at the lab
- Reports of Analysis released within one business day of analysis and detection confirmations
- Reporting summaries designed to import directly into your company's data systems

#### **Kent Agri Lab Ltd. maintains:**

CFIA Accredited for All Crop Kinds and Mixtures – Lab #1125, Purity and Germination  
Canadian Seed Institute Accredited (CSI)  
ISO/IEC 17025 Accredited Testing Lab  
ISO/IEC 9001:2015 Registered  
Members of Commercial Seed Analysts' Association of Canada

***Call or email to arrange for the REGAL/ Phytosanitary Inspection of samples – ask to speak with Betty or Brigitte.***

Regards,

CEO/Partner  
Kent Agri Lab Ltd.
